

Travel Pack

Item #: 300200 red, green, yellow, blue (set of four cloths with pouch)

PROBLEM : You want to share with others how the Norwex EnviroCloth™ can get all the surfaces in their homes as clean as possible, as quickly as possible—without chemicals that can make their families sick and without paper towels that contribute to overloaded landfills and deforestation.

SOLUTION : Rely on our Travel Pack to help you share the remarkable capabilities of Norwex EnviroCloth in a more cost-effective way. Just like our full-size EnviroCloth, the Travel Pack's smaller version cleans safely, quickly and thoroughly to save time, money and the environment using only water! Plus the Travel Pack is convenient on the go!

Description:

Each of the four Norwex antibacterial Microfiber cloths in our Travel Pack removes dust, dirt and grease from all washable surfaces using only water—no chemicals! These super-absorbent, compact EnviroCloths trap dust particles inside until they are rinsed out. Then BacLock™* in the cloth—our micro silver antibacterial agent—goes to work to self-purify and inhibit bacterial odors, mold and mildew growth within each cloth. 16cm x 16cm / 6.3" x 6.3"

Key Features:

- Constructed of super-absorbent Norwex Microfiber containing our exclusive BacLock* agent
- Can be used dry for dusting, or wet for general cleaning and heavily soiled areas
- Open spaces in the fibers created by the splitting process enable the cloths to lift away dust and dirt and absorb several times their own weight in water.
- Includes convenient travel pouch with one cloth of each color: red, green yellow and blue

Key Benefits:

- All the same great benefits of the Norwex EnviroCloth: cuts cleaning time in half by using only water; no need for harsh chemicals and save money by using only water
- The compact EnviroCloth traps dust and grime in the cloth and leave surfaces cleaner, so you won't have to clean as often.
- Convenient for travel, in the car, in your purse or diaper bag
- Handy pouch includes four different colors so you can color code for different purposes.
- Makes a great gift and perfect for sharing with others who are interested in cleaning without chemicals

How to Use:

- Use dry to attract dust and dirt particles, and wet to wipe away dirt and debris from all washable surfaces using only water.
- Slightly dirty microfiber can be washed with Norwex Dishwashing Liquid under warm running water and used again before laundering. Rinse thoroughly after washing and air or machine dry.
- Cloths that have been used heavily should be laundered using Norwex Ultra Power Plus™, which contains no fillers, after each use. Do not use bleach, fabric softeners or dryer sheets.

Demo Tips:

- Spread some butter on a mirror at your party. Place wet, folded compact EnviroCloth flat against the surface to demonstrate how well it works to remove the butter in just a few swipes without streaking.
- People are more likely to purchase if they've had a good experience with a product or know someone who has. When giving someone a cloth to try, be sure to follow up with them a week or so later. Ask them how they used it and what they thought about it. Offer them the opportunity to learn more about reducing chemicals in the home.

Did You Know?

- Norwex Microfiber products are created in state-of-the-art factories with optimal working conditions.
- Due to their synthetic nature, microfibers are stronger and less prone to breaking than natural fibers. They will not undergo protein breakdown, or proteolysis, like organic materials.

All Norwex Microfiber products carry a two-year warranty. Please visit www.norwex.com for complete details.

*Contains BacLock, an antibacterial agent for self-cleaning purposes only. The agent is solely designed to inhibit bacterial odor, mold and/or mildew growth within the product.

COMPLEMENTARY PRODUCTS

- EnviroCloth
- Spray Bottle
